

Standard Security vs. Traceability (Local) vs. Traceability (Bluehill Central)

Standard Security

Traceability
(Local)

Traceability
(Bluehill Central)

	Standard Security	Traceability (Local)	Traceability (Bluehill Central)
FILE APPROVAL			
Users with Electronic signatures	x	Unlimited	Unlimited
Electronic signatures per file	x	Up to 3	Up to 3
File type – Report template	x	✓	✓
– Method template	x	✓	✓
– Sample	x	✓	✓
– PDF report	x	✓	✓
Remote electronic signature ¹	x	x	✓
Enforce signature order	x	✓	✓
Review groups	x	✓	✓
Email notifications	x	x	✓
Flexible signature settings ²	x	x	✓
AUDIT TRAIL			
Audit trail database	x	SQL Server Express (local to frame PC)	SQL Server (hosted on domain)
Audit trail viewer	x	Local to individual system	Remote view of systems (and local system)
Backup audit trail data	x	Locally on each system ³	Remotely for multiple systems
Restore audit trail data	x	Locally on each system ⁴	Remotely for multiple systems
Print audit trail	x	Locally on each system	Remotely for multiple systems
Filter by Date	x	✓	✓
by Entry type	x	✓	✓
by User	x	✓	✓
by Application	x	x	✓
by File name	x	x	✓
by Device name	x	x	✓
by System ID	x	x	✓
by Comment	x	x	✓
Show/hide columns	x	x	✓
FILE MANAGEMENT			
Local storage	✓	✓	✓ ⁵
Network drive storage ⁶	✓	✓	✓ ⁷
Centralized database storage	x	x	✓
Revision history	Methods, samples, and report templates	Methods, samples, and report templates	Methods, samples, and report templates
Download prior revisions	x	x	✓
Upload files	x	x	✓

¹ Primary signature is always local, but 2nd and 3rd (reviews) can be made remotely in Central or locally in BHU

² Multiple Bluehill Central teams can be configured with different signature requirements

³ BHU v4.28 or greater

⁴ BHU v4.28 or greater

⁵ Only allowed when the file's signature requirements are set to None

⁶ PC must be configured on domain to store files on network drives

⁷ Only allowed when the file's signature requirements are set to None
